

# PIPE FABRICATION

## TUBE & PIPE ROLLER STANDS & WELDING TOOLS

### ADJUST-A-ROLL

A stable and adjustable stand designed for workshop fabrication handling of large diameter pipework. Available with either Steel Wheels, Rubber Wheels or Ball Transfer Heads to facilitate easy manoeuvring and positioning of large pipes. Available in three sizes, Hi (31"), Lo (24") and Table top mounting.

Adjustable between 12mm OR ½" Up To 1220mm OR 48" OD Pipework.

Maximum Weight capacity of 900 Kg per unit.

### FLANGE PINS

Designed for quick and easy installation as a convenient reference point to level your flange for tack and weld out. Hardened tapered pins automatically centre on holes 5/8" up to 1 5/8". Features knurled ends for easy use with gloves.

### ADJUST-A-FIT & ADJUST-A-FLANGE

The Adjust-A-Fit is designed to make lining up fittings a simple one-man operation. Adjustable angle up to 45°. Easily adjusted with handle from either end.

The Adjust-A-Flange is designed for attaching to the Adjust-A-Fit to bring flanges to position for tacking and welding.

### ROTARY EARTH CLAMP

A rotary earth clamp, designed to turn with a pipe stopping the earth becoming twisted or breaking contact. Takes up to 400 amps.

### MUL-T-SQUARE

The Mul-T-Square consists of two 45° blades which slide in a tough plastic handle. Each blade is made from aircraft grade aluminium. The two arms allow measurement of tight fit up, or they can be expanded up to 30" squaring of 90° fittings.

Handles up to 8" Flanges and up to 14" fittings.
